Participant Information Sheet

Colour Brings People Together: masterclass questionnaire
Version 1.1, 28 October 2026

Invitation
You are invited to take part in a short research study. Before you decide, please read this information. Ask us if anything is unclear or if you would like more information.

What is the study about?
We want to find out how this masterclass changes how people think about colour across languages, colour vision and AI tools, and which parts of it are most useful. The results will help us improve how inclusive, cross-cultural colour design is taught, and will be published so that other educators can use them.

Who is organising the research?
Associate Professor Dimitris Mylonas and PhD researcher Akvile Sinkeviciute, Computer Science, Northeastern University London, who also lead the masterclass.

Why have I been invited?
You are attending the masterclass and are 18 or over. Everyone at the session is invited.

Do I have to take part?
No. Taking part is entirely voluntary and separate from the masterclass, which is the same whether or not you take part. The questionnaire is anonymous, so we cannot see who has or has not completed it.

What will I be asked to do?
Complete an online questionnaire (Microsoft Forms) of about 10 minutes, at the end of the session or later until the end of the conference, Tuesday 3 November 2026. It asks about your background (optional), how your views changed during the session, what you learned, how useful each part was, and a few optional open questions. Every question apart from consent and the personal code is optional.

Can I withdraw?
Yes. You can stop at any time by closing the form; nothing is saved unless you submit it. After submitting, you can withdraw your answers until 15 November 2026: email us the personal code you create at the start of the form (this question is required, so that you can always withdraw) (any four characters you choose, letters or numbers, e.g. K7Q2; please don't use anything personal, such as your name, initials or a date). After that date, answers are anonymised and analysed and can no longer be removed.

Are there any risks or benefits?
The risks are minimal; the main cost is about 10 minutes of your time. The age question may feel personal: it is optional, uses bands and includes 'prefer not to say'. There is no direct benefit, but you may find it useful to reflect on what you learned.

Will my answers be kept confidential?
Yes. We do not collect your name, email address or any other contact details, and the form is set not to record who responds. Please do not include names or identifying details in your written answers. We will remove any identifying details we find before analysis, report results only in summary, and publish only short anonymised quotes, and only if you agree. Because only a small

number of people take part, a combination of background answers or a distinctive comment could indirectly reveal who wrote it. To prevent this, we will not report background details for groups of fewer than three people, and we will remove or reword anything that could point to a particular person.

How will my data be stored, and for how long?
Answers are held in Northeastern University London's Microsoft 365 account, accessible only to the two researchers, and analysed on university computers. The raw answers are deleted once they have been anonymised, by 30 November 2026. The anonymised data are kept for 5 years and then deleted. Your individual answers will not be shared in a public repository unless they can be properly anonymised, so that no one could be identified, even indirectly, and only if you agree. Otherwise, only summary results are shared.

Privacy notice
Northeastern University London is the data controller for this study. Your data are processed for research in the public interest, in line with UK data protection law (UK GDPR and the Data Protection Act 2018). For more information, see the university's data protection policy and privacy notices at https://www.nulondon.ac.uk/about-us/academic-handbook/data-protection, which also explain how to contact the university's Data Protection Officer.

What will happen to the results?
They will be published in a conference or journal paper. You will not be identified in any publication. If you would like a summary, email us.

Ethical review
This study has been reviewed and approved by the Northeastern University London Research Ethics Committee, application ID 2026-RE73.

Contact
Dimitris Mylonas (Principal Investigator): dimitris.mylonas@nulondon.ac.uk · Akvile Sinkeviciute (PhD researcher): as3508phd@students.nulondon.ac.uk. If you have a concern about how the study was run, contact the Northeastern University London Research Ethics Committee: ethics@nulondon.ac.uk.

Consent (in the online form)

Statements 1–4 are shown together at the start of the form. Participants then answer statement 5 with Yes or No (No ends the form), and statements 6 and 7, which are optional, with Yes or No.

- ☐ 1. I have read the participant information sheet (version 1.1, 28 October 2026) and have had the chance to ask questions.
- ☐ 2. I am 18 or over.
- ☐ 3. I understand that taking part is voluntary, that I can stop at any time, and that I can withdraw my answers until 15 November 2026 using my personal code.
- ☐ 4. I understand that my answers are anonymous and that any publication will report only information that does not identify me.
- ☐ 5. I agree to take part in this study.
- ☐ 6. (Optional) I agree that short anonymised quotes from my written answers may be published.
- ☐ 7. (Optional) I agree that my anonymised answers may be shared with other researchers in a research data repository, if they can be properly anonymised so that no one can be identified, even indirectly.

If a participant answers No to statement 5, the form ends without recording any answers.
